INTERNATIONAL EXHIBITION FOR RESCUE, FIRE  
PREVENTION, DISASTER RELIEF, SAFETY, SECURITY  
LEIPZIG 7 - 12 JUNE 2010

## Presse

9. Februar 2010

INTERSCHUTZ – Der Rote Hahn 2010 (7. bis 12. Juni) in Leipzig:

### **A global operation**

- Highly international exhibitor profile

**Hannover/Leipzig.** From 7 to 12 June 2010, Leipzig, Germany, will be the place to be for anyone involved in the rescue and civil security services. The Leipzig Exhibition Center will be hosting INTERSCHUTZ 2010, the international trade fair for everything the global market has to offer for the rescue, fire prevention, disaster relief, safety and civil security sectors. Organized by Deutsche Messe, Hannover, and the German Fire Protection Association (GFPA), the fair will occupy five of the venue's exhibition halls and its open-air site and is expected to field over 1,000 exhibitors and attract more than 100,000 visitors. It will be co-located with the 28th German Firefighting Convention.

INTERSCHUTZ 2010 is still several months away, but with 1,103 exhibitors from 45 nations registered so far, it is already enjoying strong international support. The top exhibitor nation is Germany, with 577 exhibitors registered so far, followed by the USA, China, the UK and Italy. In addition, the upcoming INTERSCHUTZ will for the first time feature exhibitors from Australia, Belarus, Hong Kong, Peru and Serbia.

### **Safety on the move – Innovations make fieldwork easier for fire departments and disaster relief organizations**

Nr. 20/2010

1 / 3

INTERSCHUTZ 2010 will profile the latest innovations and trends in fire protection and disaster relief. The exhibits will include ultra-modern vehicles equipped with highly advanced communication and navigation systems, plus control centers that can directly transmit video images of accident and disaster sites to response vehicles underway. There will also be displays of robots and drones used to support rescue workers in hazardous situations, as well as cutting-edge localization systems that protect aid workers and help locate victims trapped in avalanche and earthquake debris. The upcoming INTERSCHUTZ will have a strong emphasis on solutions for the emergency and rescue services. The exhibitors from these sectors will be clustered primarily in Halls 2 and 3 and on the open-air site. Here, too, exhibitor numbers are up substantially since the last INTERSCHUTZ.

**Exciting shows – Spectacular live demonstrations on the open-air site**

The bleachers at the demonstration grounds can seat 3,000 and they will be filled to capacity when the disaster and emergency rescue demonstrations are on. Located on the open-air site in the north-east section of the exhibition center, the grounds will host spectacular shows and live displays every day of the fair from 10 am to 5.30 pm. The highlights will include firefighting and fire protection demonstrations and simulated rescue operations. There is a strong exhibitor interest in this part of INTERSCHUTZ.
