

22– 26 APRIL 2024

BECOME PART OF THE QUANTUM REVOLUTION

WORLD. LEADING. INDUSTRYSHOW.

MEET THE QT-COMMUNITY AT HM 24 IN HALL 2 CONNECTING FOR THE FUTURE

If the transfer from research to industry and society is successful, development topics unfold their full potential, this is also the case with quantum technology. As a global meeting place for industry HANNOVER MESSE (22 – 26 April 2024) offers precisely the right platform for this with its Quantum Technology joint stand. Because this ensures access to industrial companies and an exchange about the next quantum revolution.

This implements the dissemination of the latest technology solutions and thus significantly accelerates the scaling of innovative applications into the most important sectors of the economy. By mediating between the quantum technology market and industry, HANNOVER MESSE provides the world's most relevant platform for application solutions, networking and inspiration. As a one-stop shop, it enables companies to find their way safely in the dynamically growing environment of this future technology.

With a participation at the joint stand Quantum Technology you will not only benefit from the professional environment of HANNOVER MESSE. You will also be part of the community from the very beginning and make Hannover a center of quantum technology, even beyond HANNOVER MESSE. For example, Deutsche Messe is participating in a quantum technology project to transfer knowledge to industry.

Let's build a new community together and start the quantum revolution!

Please note that this is an exemplary representation of a joint stand. Subject to changes.
