

HANNOVER MESSE * 22. – 26.04.2024

ENERGIZING A SUSTAINABLE INDUSTRY

Deutsche Messe

WORLD. LEADING. INDUSTRYSHOW.

**PREDICTIVE
MAINTENANCE
PAVILION**

PREDICTIVE MAINTENANCE PAVILION

Machine maintenance is on its way into a new era. Shorter downtimes and repair times, falling service costs, faster production flow, higher productivity - these are clear arguments for PM-solutions.

Plant operators are increasingly relying on predictive maintenance and are looking for suitable technologies and services at the world's largest industrial fair.

The topic of predictive maintenance and the pavilion are crowd pullers at HANNOVER MESSE. Take advantage of this global stage and present your predictive maintenance solution at the PREDICTIVE MAINTENANCE Group Exhibit to the global industry.

Both images also include additional services booked by exhibitors

PREDICTIVE MAINTENANCE PAVILION

Become a part of the Predictive Maintenance Community at HANNOVER MESSE.

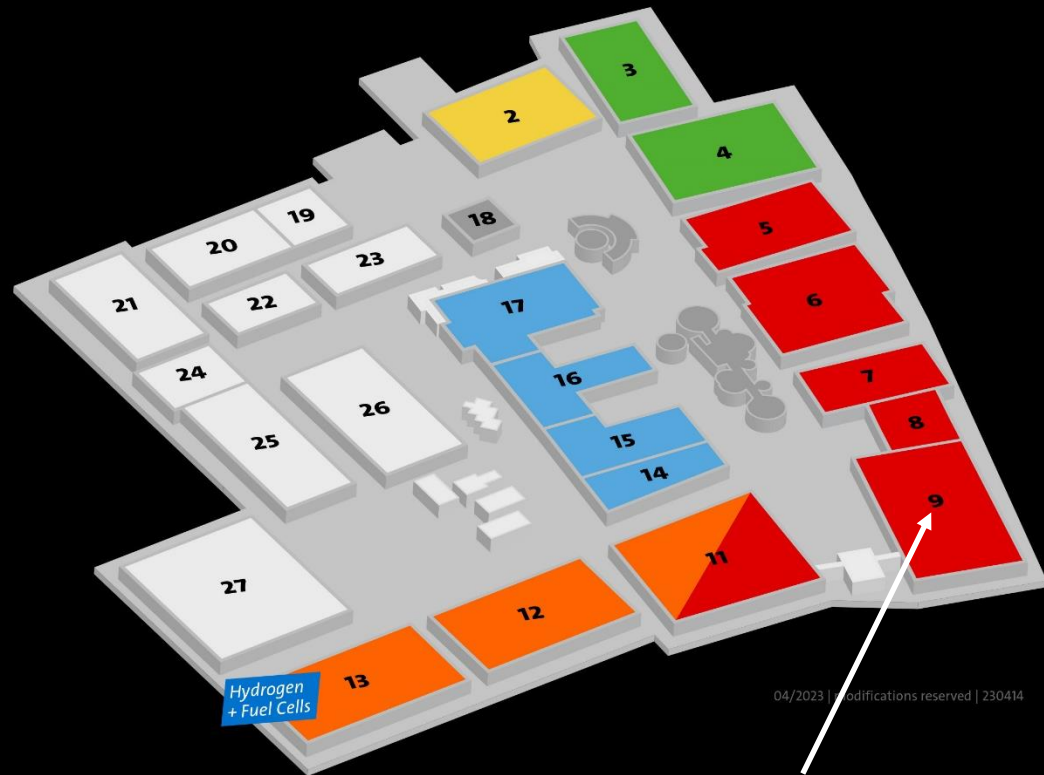

"The Predictive Maintenance Pavilion was perfect for us to present our wireless sensors, gateway, and edge platform enabling condition monitoring. High-visibility elements and location of the pavilion caught the interest of visitors. This way we were able to meet many new and existing customers and showcase our latest innovations. In 2024, we'll be back."

Sofia Gschwend, Head of Marketing, Treon

PREDICTIVE MAINTENANCE PAVILION

-  **FUTURE HUB**
Hall 2
-  **ENGINEERED PARTS & SOLUTIONS**
Halls 3–4
-  **AUTOMATION, MOTION & DRIVES**
Halls 5–9, 11
-  **ENERGY SOLUTIONS**
Halls 11–13
-  **DIGITAL ECOSYSTEMS**
Halls 14–17
