parts2clean

5 – 7 October 2021 Stuttgart, Germanyparts2clean.de

Welcome to parts2clean 2021

Trade fairs connect us - While the pandemic continues to have us firmly in its grip, it is becoming apparent what is particularly important for all of us: direct contact with our fellow people. We are certain that trade fairs are more important than ever as networking events.

As an international trade fair for industrial parts and surface cleaning parts2clean offers to you the optimal platform for customer acquisition and retention. As a hybrid event for the first time this year, you will have even more opportunities to attract the attention of visitors.

As the organizer, we naturally want to make your participation as safe and carefree as possible. Because one thing is certain: Contracts for the following year will be concluded in October at parts2clean!

We look forward to seeing you there!

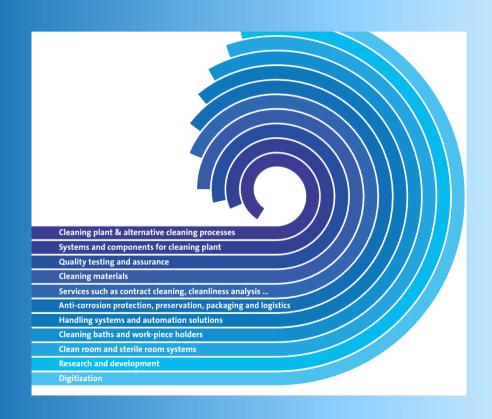

complete process chain and interesting special formats

The recipe for parts2clean's success is its cross-industry and cross-technology offerings for optimizing cleaning applications along the entire process chain. Thus, it has been the number 1 information and procurement platform for users from different industries and countries for 18 years.

Present your company and your solutions at parts2clean in the areas:

visitors - your new customer business of tomorrow

the technical and decision-making competence of **parts2clean** visitors is convincing across the board.

99% are trade visitors

25%
visitors from abroad, from 48 countries

99%
recommend the trade fair

75%
have concrete investment plans

86%

are involved in operational investment decisions

Industries

- Automotive and vehicle industry
- Mechanical engineering, plant engineering
- Surface technology, surface treatment
- Metal and plastics processing
- Electronics, electrics, semiconductor industry and IT
- Chemistry, -process engineering
- Tool and mold making
- Aerospace technology
- Medical and pharmaceutical technology
- Optics and precision mechanics
- Contract cleaning and other industries

parts2clean - Signpost and source of inspiration

parts2clean offers managers and specialists from production, quality assurance, design and development comprehensive information on current trends, technologies and new developments in the cleanroom sector across all industries.

"Trend topic cleanroom "

Topics such as cleanroom, cleaning, disinfection, air filtration and purification are of enormous importance, especially today, because modern research, development and manufacturing processes increasingly require environmental conditions in which the airborne particle concentration must not exceed limit values. Therefore, parts 2 clean offers you, as a provider of such solutions, the right platform to present yourself and your products in the best possible way!

knowledge source and visitor magnet - the specialist forum

Benefit from one of the most internationally popular sources of knowledge through the bilingual technical forum. The simultaneously translated (German <> English) lectures deal with trends, innovations as well as topics and developments from all areas of industrial parts and surface cleaning.

- Broad range of topics
- Concentrated know-how
- Practice-oriented solutions
- More than 1,300 participants
- Renowned experts from industry, research and science
- Perfect stage to present your expertise and solutions
- In cooperation with Fraunhofer

special format QSREIN 4.0 as a future hub

The change in numerous industrial sectors and markets presents companies with new and changed tasks - also in industrial parts and surface cleaning.

This trend is also reflected by parts2clean in its cooperation with FiT (Fachverband industrielle Teilereinigung e.V.).

The Future Hub QSRein 4.0 is the meeting place for exhibitors and users to discuss research and development work and adaptable process solutions.

"We had a successful parts2clean 2019. A lot of interested parties came to our booth who did not know our products yet. Well over half of the contacts we were able to generate here were companies we had not previously known.(...)"

Manfred Rieck, Marketing, Krüss GmbH

In cooperation with

process chain component cleaning

Complete view of the process chain component cleaning

The need for ultra-fine cleaning solutions is growing, on the one hand due to higher cleaning requirements for products of the medical sector, optical or automotive industries, and on the other hand due to new manufacturing processes such as additive manufacturing.

The CEC shows the complete process chain of component cleaning, from pretreatment to cleaning with suitable process chemistry and cleaning baskets, further to packaging and transport, and finally to the verification of component cleaning in the cleanroom laboratory.

exhibitor comments

"parts2clean has proven to be very valuable for us. The visitors here are very focused, so we got some very good leads from Germany and other countries in Europe. It's a good start for our entry into the European market."

Edwin Zeng, Sales Manager, Hitachi High Technologies, Singapore Pte. Ltd.

"We have been exhibiting at parts2clean for more than ten years. We appreciate the high quality of the trade visitors and the interesting discussions. On the last day of the trade fair, we again received concrete orders directly at our booth. Our annual sales growth, even in times of a declining economy, is based on participation in trade shows like this, along with many other factors."

Tobias Jessberger, CEO, Jessberger GmbH

exhibitor comments

"The economy has changed and there is a lot going on. For us, this has meant that the trade fair was significantly better than in previous years, indeed sensational. We were able to hold very many and very good technical discussions with company representatives from the automotive and vehicle industry, from the manufacture of large bearings and aviation. And that from different countries."

Albert R. Maurer, CEO, Maurer Magnetic AG

"The quality of the visitors at parts2clean is very good. We were able to conduct profound discussions, which will certainly result in some business. In addition, we were able to discover new potential markets for us."

Stephen Playdon, Regional Business Manager, MicroCare Europe BVBA

exhibitor comments

"For us, parts2clean 2019 went very well. We had a slightly larger booth than in previous years and were noticed even more by the visitors. It seemed that people have time again to look at new topics, and technologies like CO² snow blasting are just right for this. This involves tasks from the field of medical technology. We also had the impression that the trade show was increasingly visited by visitors from the semiconductor supplier industry. Cleaning tasks in the manufacture of battery systems and fuel cells also played a role in the discussions. The great thing about parts2clean is that visitors usually come with concrete tasks. Our experience is that we can generate an average order intake of 30 percent from these very well-founded contacts in the following one to two years."

Karl-Heinz Menauer, Sales & Technology, acp systems AG

Next Steps

- Calculate your booth via our shop and register directly without worries
 → until 31.05.2021 you can cancel free of charge!
- You can find the current <u>hygiene concept</u> and <u>site overview</u> on our website
- You would like to book a booth construction package? You can find all information about our packages <u>here</u>
- We are currently working at full speed on our hybrid concept. You will receive further information at the beginning of April.
