Perfect surfaces – 300 reasons for your visit

SurfaceTechnology GERMANY (formerly O&S) showcases the entire spectrum of surface treatment technology, including upstream and downstream processes. This comprehensive overview of innovative solutions, the latest developments and current trends in interdisciplinary technology makes a visit to SurfaceTechnology GERMANY essential for all those involved in industrial surfacing techniques. The event offers a competitive edge by providing important insights and information to your employees and your company. Here you can meet approx. 300 exhibitors – all experts in their individual fields – who can offer the technological and business solutions you are looking for and thus strengthen your company's competitive performance.

SurfaceTechnology GERMANY takes place at the Stuttgart exhibition venue alongside LASYS, CastForge and AUTOMOTIVE Shows, thus generating numerous interesting synergistic benefits that could prove valuable to your company.

Your admission ticket entitles you to visit all the trade shows.

Tickets, prices, travel

Admission prices

One-day ticket	€ 29
One-day ticket (reduced)	€ 17
Full-event ticket	€ 42

All prices incl. VAT at the current rate – We reserve the right to make changes.

Opening hours

Daily from 9.00 a.m. to 5.00 p.m.

Address of Exhibition Grounds

Messegelände Stuttgart, Messepiazza
(Flughafenstraße/Flughafen), 70629 Stuttgart

Concentrated expertise to boost your business: SurfaceTechnology GERMANY

New materials and composite materials for the treatment and coating of parts are becoming increasingly important and are of special relevance in energy and resource efficiency, REACH, lightweight engineering and Industrie 4.0. At SurfaceTechnology GERMANY you will find the expertise and meet the professionals who can answer your questions about these and other complex future-looking issues.

In a market overview conveniently concentrated at one venue you can discover state-of-the-art processes and solutions in the various areas of surface treatment technology. There is no better place to access the know-how required to systematically improve process efficiency, quality and cost-effectiveness across the whole production chain.

Target the information you need in the specific areas that will benefit your company:

- Coating materials
- Services
- Electroplating technology
- Industrial plasma and laser-based surface treatment technology
- Equipment for measuring, testing and analysis
- Nano/micro technologies
- Surface treatment
- Cleaning
- Blasting technology
- Thermal spraying
- Environmental engineering and supply systems
- Pre-treatment

Highlights that promise added value

Special display: State-of-the-art surface treatment technology

The acclaimed experts at the themed joint display stand “Process chain surface technology” are top specialists in downstream and upstream areas of manufacturing who will provide valuable insights into this diverse sector.

Guided Tours

Target the information you need on special topics across the entire spectrum of surface treatment technology. Discover the solutions, innovations and suppliers that address your specific tasks and problems. Plan your trade fair visit for added value and use the opportunity to engage in personal discussion.

ZVO group presentation

Occupying a total area of approx. 3,500 m², the group presentation (formerly World of Surface Treatment) of the industry association ZVO will showcase a compact range of processes, plant and components. Numerous market-ready products and innovative research projects will be presented by some 75 processing subcontractors and suppliers.

Themed joint display stand of VDMA

The exhibitors at the stand of the VDMA (German Engineering Federation) devoted to “Resource efficient solutions for surface treatment: environment-friendly – cost-efficient – innovative” will showcase various surface blasting and electrochemical metal processing techniques.

BMW joint presentation by young entrepreneurs

Find out about the innovative surface treatment technology and solutions developed by young German entrepreneurs at this joint display stand sponsored by the German Federal Ministry for Economic Affairs and Energy.

Forum and Speakers’ Corner in German and English

Experts from leading companies and scientists from renowned research institutes will inform you about the latest research findings in surface treatment and outline future-proof ideas for tomorrow. The Speakers’ Corner also provides an opportunity for visitors to discuss the content of the talks in depth with the respective speakers outside the formal setting of the Forum.

Forum program

Tuesday
Cleaning and pre-treatment
Wednesday
New electroplating processes
Physical surface treatment processes (PVD, CVD, thermal spraying)
Applications/use of treated surfaces
Quality assurance and process optimization
Thursday
(PVD, CVD, thermal spraying)
Industrie 4.0 in surface treatment technology
Lightweight engineering and OFT

Position as of: 3/2018. We reserve the right to make changes.

Simultaneous translation is provided for all the talks (German<>English).

The Forum program can be viewed online at www.surface-technology-germany.de/en/forum
