Ready for the future.

INTERSCHUTZ – Your operational centre for business and contacts

The world's leading trade fair for the fire and rescue services, civil protection, safety and security is taking place in June 2020 under the motto “Teams, Tactics, Technology – Connected for Protection and Rescue”.

In other words, the world's leading trade fair draws attention to two aspects crucial to this sector: the use of innovative digital solutions and the effective collaboration of various players and institutions.

The keynote theme Safety and Security – which embraces everything from personal **protection equipment** to the increasingly important issue of **control centre and communication technology** – is of special relevance in every sector represented at INTERSCHUTZ.

INTERSCHUTZ – join us in shaping the future!

1,498

Protective Equipment: Maximum security in dangerous conditions

INTERSCHUTZ is your opportunity to demonstrate to fire fighters, rescue workers and teams providing technical support in emergencies and hazardous situations that they can rely on your products.

Present your innovative solutions and products for protecting emergency personnel from health risks such as exposure to carcinogens and other hazardous materials.

You can showcase your products on the demonstration site in live simulations of different risks and situations.

Communications & Control Center Solutions: innovative aids for helpers

The keynote theme “Teams, Tactics, Technology – Connected for Protection and Rescue” is very relevant to the safety and security technology sector, as well as to the important topic of digital technology and its role in communication and teamwork between emergency and rescue services. This is epitomized by **geo-information technology**.

Whether fire protection or firefighting, rescue services or accident control and management, every second counts in rescue and emergency operations. This is why geo-information systems (GIS) that deliver spatial data on access routes, the position of hydrants, gas pipes, etc. prove so invaluable to the rescue services in planning the deployment of resources, in operational control and the evaluation of incident responses.

Showcase your solutions and products in the area of safety and security in Halls 14, 15, 16 and on the open-air site at INTERSCHUTZ.

Your area of expertise: Safety and security

Networking:

All the key sectors represented at one venue

One of the chief benefits of the INTERSCHUTZ concept is that it shows how different sectors and skills across the spectrum are interconnected. It is the collaboration of teams and the use of technology and innovative products from different disciplines that ensures an optimal response to incidents. Digital technology and software play a key role, but it is the networking of teams that is crucial.

State of the art:

Meeting new risks and challenges

The type, frequency and extent of major catastrophes is constantly changing. INTERSCHUTZ deals with the new emerging risks and challenges and offers appropriate solutions. Exhibitors enjoy a unique opportunity to demonstrate their innovative products and position themselves as innovators and influencers!

Special event:

Digitalization & Transformation

The number of mega cities continues to increase, thus posing greater challenges to the rescue and emergency services. How does this trend affect civil protection now – and in the future? What pressures and problems do we face in the age of urbanization? This special event is dedicated to these issues and will present solutions and innovations for improving the interaction and collaboration of the various rescue services.

Your area of expertise in Halls 14 & 15: Protective Equipment

Keynote theme for your sector

- Personal protective equipment (breathing apparatus and protection against radiation hazards, protective clothing and equipment, textiles, wet and dry care systems for protective clothing)

A complete overview of your sector at INTERSCHUTZ

As an exhibitor you benefit from the concentrated flow of visitors at the event.

The optimized layout of themed displays makes it easier for visitors to quickly find what interests them, whether manufacturers, suppliers or the special topics, talks and events that take place in the Convention Center.

Be there. It's worth it!

The main reasons why you should exhibit:

- You can network with players in your business sector from across the world
- You can present your innovative products to the professional community
- You will meet buyers and decision-makers from the global marketplace
- Our special events and conferences provide an opportunity to discuss all the major themes and issues affecting the security sector
